Philippine Statistics Authority, 2022 Census of Agriculture and Fisheries

Note:

- The results reflect the number and proportion of barangays with operational machinery and equipment at the time of visit, either government-owned or privately-owned, that are accessible for public use whether free of charge or for a fee. Machineries and equipment that were temporarily or permanently non-operational at a time of visit were excluded from being counted as available.
- The results are based on the conduct of the 2022 Census of Agriculture and Fisheries (CAF) interviews among incumbent barangay officials from September to November 2023.
- The 2022 CAF covered 820 barangays in the barangay-level interviews based on 4<sup>th</sup> quarter of 2022 Philippines Standard Geographic Code.
