

ISABELA INFLATION REPORT FOR ALL INCOME HOUSEHOLD June 2025 (2018=100)

Inflation is the yearly increase in the average price of goods and services within an economy. Each unit that is purchased might be significantly cheaper if prices rise significantly. The Commodity Price Index (CPI) is used to calculate inflation rates and track prices annually. "Year-over-year change" is another commonly used expression. Additionally, it shows how much prices varied throughout the course of the two periods of time.

YEAR-ON-YEAR

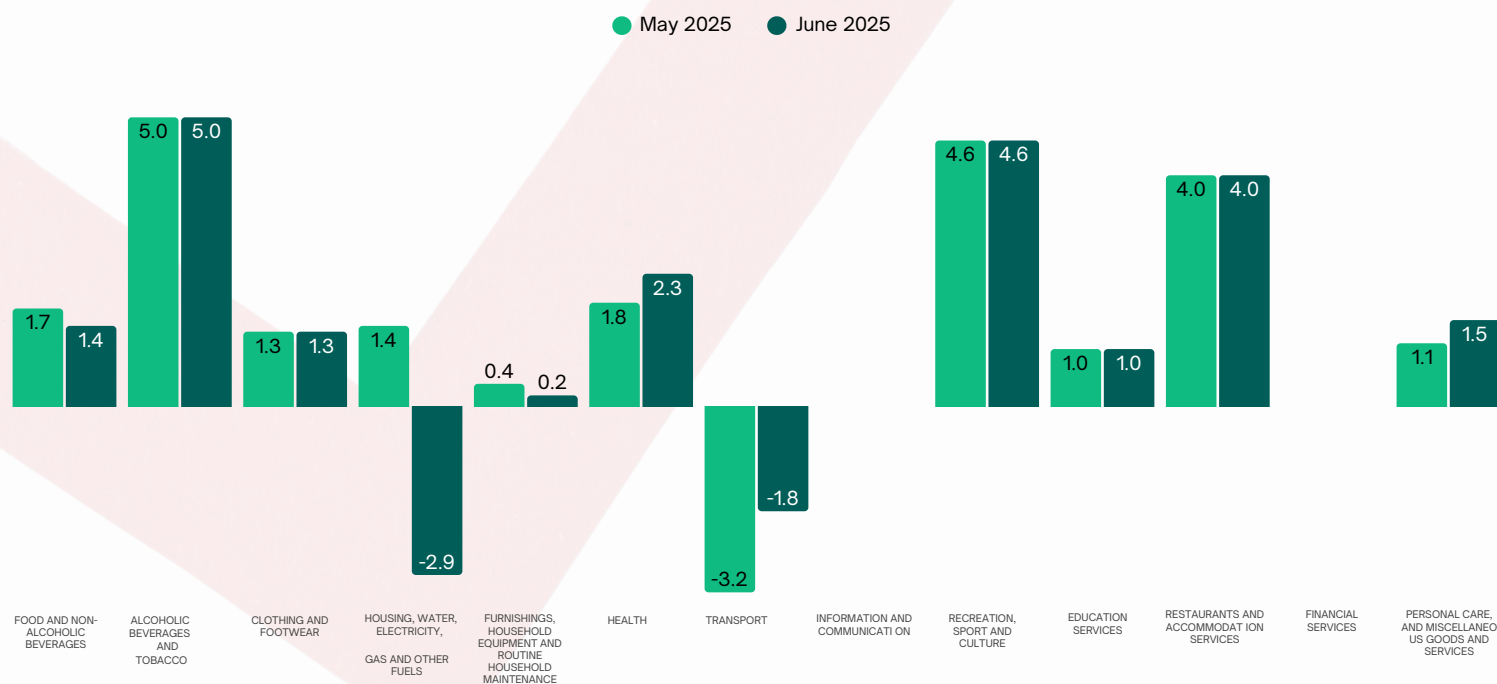

Isabela's inflation decreased to 0.7 percent in June 2025 from 1.5 percent in the previous month, similar to national and regional (Cagayan Valley Region) figures. In June 2024, the provincial inflation rate was higher at 3.2 percent.
