Management Council (PDRPMC), conducted a comprehensive one-day lecture and hands-on training on the Basic Life Support (BLS) and Standard First Aid (SFA).

The training aimed to equip PSA-Isabela personnel with essential life-saving skills, including Cardiopulmonary Resuscitation (CPR), proper wound care, and emergency response techniques.

The event featured expert trainers from the PDRPMC headed by the Assistant Provincial Disaster Risk Reduction Management Officer, Romanico D. Daguiro, who guided the PSA personnel through the simulation of choking rescue techniques, bandaging methods, and emergency medical response strategies. Through these activities, PSA-Isabela personnel enhanced their preparedness to respond effectively to medical emergencies in the workplace and in the community.

The initiative aligns with the PSA-Isabela's commitment to employee welfare and disaster preparedness, ensuring that members are equipped with critical survival skills.
